The start of construction is supposed to begin before Dec. 2013, hopefully done within a year and half. The actual work may finish sooner, depending on the BSS schedule.

Fantastic. I'm glad we are all able to be on the same email chain now. Does anyone have a timeline on when this project is suppose to begin and finish?
Thanks,
Nate

And, FYI, this is a bike LANE project that will reduce the width of the median to allow bike lane installation and retain the same auto capacity. Abbass Vajar, copied here, is the project manager.
